

MARIO KART DX

Bandai Namco

The next game in the extremely popular racing series is here with new courses, new game modes, new karts, new features and a rainbow LED lit cabinet featuring a 42" HD monitor. The popular NAM-CAM feature that places the player's face over the kart has been updated with "Funny Face Frames" where players can stretch, squeeze, and transform their faces into many different appearances.

Linkable up to four cabinets, the game has three game modes: Grand Prix, Versus, and Co-Op. In Grand Prix mode, players can compete through 40 rounds over five selectable cups. Versus mode offers competitive racing excitement for all players. The new 2-Person Co-Op mode features "Fusion Karts." One person drives while the other "shoots" other competitors.

With over 20 types of karts that can specifically trigger over 90 types of items, the racing possibilities of Mario Kart Arcade GP DX are endless and players will be coming back to play again and again.
