GUM DROP

GUM DROP

Gum Drop is an exciting new redemption game that features a goofy cast of characters providing quick action, great sounds, and a cheerful graphics package. The object is to skillfully time the release of your ball to drop into any one of nine different score channels. Successfully getting your ball into any one of the BONUS spaces allows the player to enter the bonus mode where they then use their available balls to try and fill a candy jar. If they can successfully fill the jar with the allotted balls, they'll win a massive amount of tickets! The game features thousands of LED lights, a 350 watt sound system, and an impressive menu for an endless amount of operator desires ensuring a quick ROI in all distribution territories.
